

BIG TECH IS WATCHING

While companies like Meta (Facebook, WhatsApp, Instagram) and Google claim end-to-end encryption and data privacy, they are known to collect and share **metadata** about your use of their platforms and supply information to government agencies such as DHS & ICE.

Metadata includes things like:

- The subject line of your emails
- The length of your conversations
- When your conversations happened
- Your location when communicating
- Who was part of your conversations

Protect yourself by getting off of these platforms and using tools known to protect your privacy such as:

BROWSERS	SEARCH	EMAIL	MESSAGING
 Brave	 DuckDuckGo	 ProtonMail	 Signal
